Pairs Matching Game

Print two copies of each page to create your own matching pairs memory game. Place all the cards on a table face down, and take turns to pick up two cards trying to find pairs.

Because just like stars that burn and gleam,
with all their endless, golden light...

This world belongs to everyone,
and everyone should shine as bright.

Your dreams are big, and so are mine,
they stretch beyond the tallest trees.

They soar across the brightest skies,
and dance upon the endless seas.

Look up, look up! The sky is wide,
with stars that twinkle far and bright.

They shine for all, both near and far,
a gift of endless golden light.

For kindness spreads like beams of gold,
a glowing thread from you to me.

And just like stars, when hearts shine bright,
they light the world for all to see.

So never let the world grow small,
or tell you who you cannot be.

The sky is wide, the stars are ours,
as bright as dreams, as wild, as free.

No voice should ever be too small,
no hand should go unseen.

No heart should ache from words unkind,
no child should fear they're less than seen.

So when you see a shooting star,
go on and make a wish or two.

Wish for love, wish for light,
and wish the same for others too.

No one owns the stars above,
they're meant for every single one.

They glow for love, they glow for dreams,
for every child beneath the sun.

Like stars that sparkle high and free,
we all deserve to laugh and grow.

No matter where our feet may stand,
the world is ours to learn and know.
